Editors

Professor Roland W. Lewis
School of Engineering, University of Wales Swansea,
Swansea SA2 8PP, UK (*E-mail:* ijnmeuk@wiley.co.uk)

Professor Ted Belytschko
Department of Mechanical Engineering, Northwestern University
Evanston, IL 60208, USA (*E-mail:* ijnme-us@northwestern.edu)

Associate Editors

Professor René de Borst
Koiter Institute Delft, Delft University of Technology
P.O. Box 5058, NL-2600 GB Delft, The Netherlands
(*E-mail:* ijnme@LR.TUDelft.nl)

Professor Charbel Farhat
Department of Mechanical Engineering and Institute for Computational and Mathematical Engineering, Stanford University, Stanford,
CA 94305, USA (*E-mail:* cfarhat@stanford.edu)

Founding Editors

Professor O. C. Zienkiewicz
Department of Civil Engineering, University of Wales Swansea,
Swansea SA2 8PP, UK

Professor R. H. Gallagher†

Editorial Board

J. S. Arora
University of Iowa,
Iowa City, USA

R. J. Astley
University of Southampton, UK

I. Babuska
University of Texas at Austin, USA

K. J. Bathe
MIT, Cambridge, MA, USA

J. L. Batoz
Universite de Technologie Compiegne,
Compiegne, France

Z. P. Bažant
Northwestern University,
Evanston, IL, USA

M. P. Bendsoe
Technical University of Denmark,
Lyngby, Denmark

D. Beskos
University of Patras, Greece

G. F. Carey
University of Texas at Austin, USA

J. L. Chenot
ENSM de Paris, Valbonne, France

Y. K. Cheung
University of Hong Kong

R. W. Clough
University of California,
Richmond, CA, USA

G. Comini
Universita degli Studi di Udine, Italy

C. A. Felippa
University of Colorado, Boulder, USA

J. Fish
Rensselaer Polytechnic Institute, USA

P.-L. George
INRIA, Le Chesnay, France

M. Géradin
ISIS, JRC, Ispra, Italy

R. Haber
University of Illinois at
Urbana-Champaign, IL, USA

R. T. Haftka
Aerospace Eng, Mech & Eng Sci,
Gainesville, FL, USA

T. K. Hellen
Oakfield House, Bristol, UK

T. J. R. Hughes
University of Texas at Austin, USA

S. Idelsohn
Universidad Nacional del Litoral,
Argentina

M. Kleiber
Polish Academy of Sciences, Warsaw,
Poland

P. Le Tallec
Université Paris Dauphine and l'Ecole
Polytechnique, Palaiseau, France

X. K. Li
Dalian University of Technology,
People's Republic of China

W. K. Liu
Northwestern University,
Evanston, IL, USA

G. Maier
Polytechnic of Milan, Italy

H. A. Mang
Technische Universität Wien, Austria

K. Morgan
University College of Swansea, UK

Z. Mroz
Polish Academy of Sciences,
Warsaw, Poland

A. K. Noor
Old Dominion University,
Hampton, VA, USA

J. T. Oden
University of Texas at Austin, USA

R. Ohayon
CNAM, Paris, France

J. Oliver
Technical University of Catalonia,
Barcelona, Spain

E. Oñate
Universidad Politécnica de Catalunya,
Barcelona, Spain

M. Ortiz
California Institute of Technology,
Pasadena, CA, USA

K. C. Park
University of Colorado, Boulder, USA

D. Peric
University of Wales Swansea, UK

E. Ramm
Stuttgart University, Germany

J. N. Reddy
Texas A&M University,
College Station, TX, USA

K. Runesson
Chalmers University of Technology,
Göteborg, Sweden

S. Saigal
Carnegie Mellon University,
Pittsburgh, PA , USA

A. Samuelsson
Chalmers Tekniska Högskola,
Göteborg, Sweden

B. Schrefler
Universita di Padova, Italy

M. S. Shephard
Rensselaer Polytechnic Institute,
Troy, NY, USA

E. Stein
University of Hannover, Germany

R. L. Taylor
University of California, Berkeley, USA

N. P. Weatherill
University of Wales Swansea, UK

P. Wriggers
University of Hannover, Germany

G. Yagawa
University of Tokyo, Japan

Advisory Board

M. Ainsworth
University of Strathclyde,
Glasgow, UK

M. H. Aliabadi
Imperial College, UK

F. Armero
University of California, Berkeley, USA

F. Auricchio
Universitá di Pavia, Italy

D. J. Benson
University of California, San Diego, USA

M. A. Bradford
University of New South Wales,
Australia

J. S. Chen
University of California at Los Angeles
(UCLA), Los Angeles, USA

A. Combescure
LaMCos INSA de Lyon,
Villeurbanne, France

L. Franca
University of Colorado, Denver, USA

D. Givoli
Technion, Haifa, Israel

I. Harari
Tel Aviv University, Israel

A. Huerta
Universidad Politecnica de Catalunya,
Spain

G. M. Hulbert
The University of Michigan, USA

T. A. Laursen
Duke University, Durham,
NC, USA

J. Peraire
Massachusetts Inst of Technology, USA

C. Schwab
ETH Zuerich, Switzerland

O. Sigmund
Technical University of Denmark,
Lyngby, Denmark

P. Steinmann
Universität Kaiserslautern, Germany

K. K. Tamma
University of Minnesota, USA

E. Van der Giessen
University of Groningen, The Netherlands

L. C. Wrobel
Brunel University, UK

N. J. Zabaras
Cornell University, USA

International Journal for
Numerical Methods in Engineering

Volume 64 Number 1 • 7 September 2005

A new formulation of Signorini's type for seepage problems with free surfaces: H. Zheng, D. F. Liu, C. F. Lee and L. G. Tham 1

On the convergence of stationary sequences in topology optimization: A. Evgrafov and M. Patriksson 17

Direct solution of ill-posed boundary value problems by radial basis function collocation method: A. H.-D. Cheng and J. J. S. P. Cabral 45

NSCD discrete element method for modelling masonry structures: B. Chetouane, F. Dubois, M. Vinches and C. Bohatier 65

Mixed shell element for seven-parameter formulation: Y. Hahn and N. Kikuchi 95

Response surface approach to aerodynamic optimization design of helicopter rotor blade: H. Sun and S. Lee 125

Volume 64 Number 2 • 14 September 2005

Stress-adapted numerical form finding of pre-stressed surfaces by the updated reference strategy: R. Wüchner and K.-U. Bletzinger 143

A monolithic approach for interaction of incompressible viscous fluid and an elastic body based on fluid pressure Poisson equation: D. Ishihara and S. Yoshimura 167

A comparison of eigensolvers for large-scale 3D modal analysis using AMG-preconditioned iterative methods: P. Arbenz, U. L. Hetmaniuk, R. B. Lehoucq and R. S. Tuminaro 204

Non-reflecting boundary conditions for atomistic, continuum and coupled atomistic/continuum simulations: H. S. Park, E. G. Karpov and W. K. Liu 237

A combined space–time extended finite element method: J. Réthoré, A. Gravouil and A. Combescure 260

Volume 64 Number 3 • 21 September 2005

A discrete splitting finite element method for numerical simulations of incompressible Navier–Stokes flows: K. K. Q. Zhang 285

Automatic energy conserving space–time refinement for linear dynamic structural problems: P. Cavin, A. Gravouil, A. A. Lubrecht and A. Combescure 304

Convergence analysis and validation of sequential limit analysis of plane-strain problems of the von Mises model with non-linear isotropic hardening: S.-Y. Leu 322

The *International Journal for Numerical Methods in Engineering* is covered by the following abstracting and indexing services:

Applied Mechanics Reviews, BHRA Fluid Engineering Centre (Elsevier), Cambridge Scientific Abstracts/Materials Information, CompuMath Citation Index® (ISI), Current Contents®/Engineering, Computing & Technology (ISI), Earthquake Engineering Abstracts (NISEE), Ei COMPENDEX PLUS, Ei Page One, Geobase (Elsevier), Geotechnical Abstracts (Geotext Services), Indian Society of Earthquake Technology Bulletin, INSPEC, International Aeronautical Abstracts & Database (AIAA), International Civil Engineering Abstracts (Emerald), International Petroleum Abstracts, ISI Alerting Services, Materials Science Citation Index (ISI), Mathematical Reviews, Mechanics, PASCAL Database (INIST), Science Citation Index Expanded (also known as SciSearch®) (ISI), Science Citation Index® (ISI), Shock & Vibration Digest (Sage), Tribology and Corrosion Abstracts, Zentralblatt für Mathematik/Mathematics Abstracts.

IJNMBH 64 1–2110 (2005) • ISSN 0029-5981

Suppression of spurious intermediate frequency modes in under-integrated elements by combined stiffness/viscous stabilization: W. J. Trevor Daniel and T. Belytschko 335

High-order extended finite element method for cracked domains: P. Laborde, J. Pommier, Y. Renard and M. Salaün 354

A formulation for electrostatic-mechanical contact and its numerical solution: D. P. Boso, G. Zavarise and B. A. Schrefler 382

Boundary adaptation in grid generation for CFD analysis of screw compressors: A. Kovacevic 401

Volume 64 Number 4 • 28 September 2005

Generalization of robustness test procedure for error estimators. Part I: formulation for patches near kinked boundaries: B. Boroomand and F. Mossaiby 427

Generalization of robustness test procedure for error estimators. Part II: test results for error estimators using SPR and REP: B. Boroomand and F. Mossaiby 461

A new computational method for transient dynamics including the low-and the medium-frequency ranges: P. Ladevèze and M. Chevreuil 503

Analysing microwave devices using a symmetric coupling of finite and boundary elements: S.-C. Lee, M. N. Vouvakis, K. Zhao and J.-F. Lee 528

Properties of time integration with first order filter damping: S. Krenk and J. R. Høgsberg 547

Volume 64 Number 5 • 7 October 2005

Wave propagation analysis in inhomogeneous piezo-composite layer by the thin-layer method: A. Chakraborty, S. Gopalakrishnan and E. Kausel 567

Multidisciplinary design optimization based on independent subspaces: M.-K. Shin and G.-J. Park 599

Polynomial chaos representation of a stochastic preconditioner: C. Desceliers, R. Ghanem and C. Soize 618

A robust non-linear mixed hybrid quadrilateral shell element: W. Wagner and F Gruttmann 635

Mixed finite element method for coupled thermo-hydro-mechanical process in poro-elasto-plastic media at large strains: X. Li, Z. Liu and R. W. Lewis 667

Volume 64 Number 6 • 14 October 2005

Numerical modelling of chemical effects of magma solidification problems in porous rocks: C. Zhao, B. E. Hobbs, A. Ord, S. Peng, H. B. Mühlhaus and L. Liu 709

Optimum shapes of tire-treads for avoiding lateral slippage between tires and roads: S. R. Ahmed, S. K. D. Nath and M. W. Uddin 729

The least-squares meshfree method for elasto-plasticity and its application to metal forming analysis: K.-C. Kwon, S.-H. Park and S.-K. Youn 751

Elastic PMLs for resonator anchor loss simulation: D. S. Bindel and S. Govindjee 789

An adaptive hybrid time-stepping scheme for highly non-linear strongly coupled problems: P. K. Vijalapura and S. Govindjee 819

Volume 64 Number 7 • 21 October 2005

Finite element analysis of flows in secondary settling tanks: D. Kleine and B. D. Reddy 849

A new boundary element technique without domain integrals for elastoplastic solids: K. Bertoldi, M. Brun and D. Bigoni 877

Validation of the LES approach in Kiva-3V on a square duct geometry: V. Huijnen, L. M. T. Somers, R. S. G. Baert and L. P. H. de Goey 907

A simultaneous solution procedure for strong interactions of generalized Newtonian fluids and viscoelastic solids at large strains: B. Hübner and D. Dinkler 920

Three-dimensional immersed finite element methods for electric field simulation in composite materials: R. Kafafy, T. Lin, Y. Lin and J. Wang 940

Node placement for triangular mesh generation by Monte Carlo simulation: H. Zhang and A. V. Smirnov 973

Volume 64 Number 8 • 28 October 2005

Strong and weak arbitrary discontinuities in spectral finite elements: A. Legay, H. W. Wang and T. Belytschko 991

An assumed-gradient finite element method for the level set equation: H. M. Mourad, J. Dolbow and K. Garikipati 1009

Improved implementation and robustness study of the X-FEM for stress analysis around cracks: E. Béchet, H. Minnebo, N. Moës and B. Burgardt 1033

An algorithm for modelling the interaction of a flexible rod with a two-dimensional high-speed flow: D. Tam, R. Radovitzky and R. Samtaney 1057

Decomposition contact response (DCR) for explicit finite element dynamics: F. Cirak and M. West ... 1078

Parametric meshless Galerkin method: H. Hosseini-Toudeshky and M. Musivand-Arzanfudi 1111

Volume 64 Number 9 • 7 November 2005

Integration schemes for von-Mises plasticity models based on exponential maps: numerical investigations and theoretical considerations: E. Artioli, F. Auricchio and L. Beirão da Veiga 1133

A finite-strain quadrilateral shell element based on discrete Kirchhoff–Love constraints: P. M. A. Areias, J.-H. Song and T. Belytschko 1166

Vertical dynamic responses of a simply supported bridge subjected to a moving train with two-wheelset vehicles using modal analysis method: P. Lou 1207

An efficient numerical method for the solution of sliding contact problems: L. Ma and A. M. Korsunsky 1236

An adaptive fixed mesh method for modelling and simulating of unsteady two-phase flows with sharp physical interfaces: N. H. Sharif and N.-E. Wiberg 1256

Volume 64 Number 10 • 14 November 2005

Numerical accuracy of a Padé-type non-reflecting boundary condition for the finite element solution of acoustic scattering problems at high-frequency: R. Kechroud, X. Antoine and A. Soulaïmani 1275

Smart element method II. An element based on the finite Eshelby tensor: G. Wang, X. Liu, S. Li and N. Sitar 1303

Efficient numerical strategies for spectral stochastic finite element models: D. B. Chung, M. A. Gutiérrez, L. L. Graham-Brady and F.-J. Lingen 1334

An enhanced co-rotational approach for large displacement analysis of plates: B. A. Izzuddin 1350

A new approach for displacement functions of a curved Timoshenko beam element in motions normal to its initial plane: J.-S. Wu and L.-K. Chiang 1375

C^0 solid elements for materials with strain gradient effects: S. Swaddiwudhipong, J. Hua, K. K. Tho and Z. S. Liu 1400

Volume 64 Number 11 • 21 November 2005

A compact adjacency-based topological data structure for finite element mesh representation: W. Celes, G. H. Paulino and R. Espinha 1415

Efficient non-linear solid–fluid interaction analysis by an iterative BEM/FEM coupling: D. Soares Jr, O. von Estorff and W. J. Mansur 1416

A boundary element method for analysis of thermoelastic deformations in materials with temperature dependent properties: T. Matsumoto, A. Guzik and M. Tanaka 1432

A hybrid fuzzy/genetic algorithm for the design of offshore oil production risers: B. de Souza, L. P. de Lima, B. Pinheiro Jacob and N. Francisco Favilla Ebecken 1459

A strategy to identify exciting forces acting on structures: E. Turco 1483

An incremental 2D constitutive model accounting for linear viscoelasticity and damage development in short fibre composites: J. Varna and M. Oldenbo 1509

A compact adjacency-based topological data structure for finite element mesh representation: W. Celes, G. H. Paulino and R. Espinha 1529

Volume 64 Number 12 • 28 November 2005

Path-generation of articulated mechanisms by shape and topology variations in non-linear truss representation: A. Kawamoto 1557

A unified formulation for continuum mechanics applied to fluid–structure interaction in flexible tubes: C. J. Greenshields and H. G. Weller 1575

A finite volume method for large strain analysis of incompressible hyperelastic materials: I. Bijelonja, I. Demirdžić and S. Muzaferija 1594

Boundary element-free method (BEFM) for two-dimensional elastodynamic analysis using Laplace transform: K. M. Liew, Y. Cheng and S. Kitipornchai 1610

A comparison of full non-linear and reduced order aerodynamic models in control law design using a two-dimensional aerofoil model: C. B. Allen, N. V. Taylor, C. L. Fenwick, A. L. Gaitonde and D. P. Jones 1628

The element connectivity parameterization formulation for the topology design optimization of multiphysics systems: G. H. Yoon and Y. Y. Kim 1649

Accurate correction of surface noises of polygonal meshes: J. Shen, B. Maxim and K. Akingbehin 1678

Volume 64 Number 13 • 7 December 2005

Free mesh radial basis function collocation approach for the numerical solution of system of multi-ion electrolytes: A. La Rocca and H. Power 1699

Structured pseudospectra in structural engineering: T. Wagenknecht and J. Agarwal 1735

Time integration for spherical acoustic finite–infinite element models: J.-P. Coyette, K. Meerbergen and M. Robbé 1752

Modelling convection in solidification processes using stabilized finite element techniques: D. Samanta and N. Zabaras 1769

A 3D beam-to-beam contact finite element for coupled electric–mechanical fields: D. P. Boso, P. Litewka, B. A. Schrefler and P. Wriggers 1800

Wave propagation in a simplified modelled poroelastic continuum: fundamental solutions and a time domain boundary element formulation: M. Schanz and V. Struckmeier 1816

Volume 64 Number 14 • 14 December 2005

Design spaces, measures and metrics for evaluating quality of time operators and consequences leading to improved algorithms by design—illustration to structural dynamics: X. Zhou, K. K. Tamma and D. Sha 1841

Slope stability analysis based on elasto-plastic finite element method: H. Zheng, D. F. Liu and C. G. Li 1871

Prediction of the non-ideal detonation performance of commercial explosives using the DeNE and JWL++ codes: S. Esen, P. C. Souers and P. Vitello 1889

A human-like numerical technique for design of engineering systems: C. J. K. Lee, T. Furukawa and S. Yoshimura 1915

Measuring the conformity of non-simplicial elements to an anisotropic metric field: Y. Sirois, J. Dompierre, M.-G. Vallet and F. Guibault 1944

On the central difference algorithm in discrete element modelling of impact: Y. T. Feng 1959

Volume 64 Number 15 • 21 December 2005

Optimal solid shell element for large deformable composite structures with piezoelectric layers and active vibration control: X. G. Tan and L. Vu-Quoc 1981

Assessment of conservative load transfer for fluid–solid interface with non-matching meshes: R. K. Jaiman, X. Jiao, P. H. Geubelle and E. Loth 2014

Generalized nodes and high-performance elements: R. Tian and G. Yagawa 2039

An efficient parallel computation of unsteady incompressible viscous flow with elastic moving and compliant boundaries on unstructured grids: C. H. Tai, B. Bals, Y. Zhao and K. M. Liew 2072
